

Brodrick Young

435-232-7879 | youngbrodrick10@gmail.com | <https://brodrickyong.github.io/portfolio/>

Education

Brigham Young University-Idaho
BS, Computer Engineering
GPA: 3.918

Graduated Apr 2026
Rexburg, ID

Certificates: Embedded Systems, Web Frontend, Computer Programming

Honors: Tau Beta Pi Honor Society Member

Relevant Coursework:

- **Embedded Systems:** Bare-metal C programming, microcontroller architectures, and peripheral interfacing (SPI/I2C/UART) to bridge low-level hardware directly with high-level software control.
- **Electric Circuit Analysis I and II:** Advanced study of RLC circuits, op-amps, and diodes
- **Digital Systems Design:** Circuit synthesis and simulation using Logisim and Verilog; implementing digital systems on FPGAs and verifying hardware via lab instruments.
- **Semiconductor Device Engineering:** Analyzing doping impact, PN junctions, and MOSFET transistor operation; sketching CMOS process flows and studying wafer fab contamination control.

Technical Skills:

- **Software/Tools:** LTspice, Vivado (Verilog), Altium Designer, KiCad, STM32Cube IDE, Excel (Data Analysis Toolpak), Logisim, GitHub
- **Programming Languages:** C, C++, Python, Verilog, HTML/CSS, JavaScript

Work Experience

Duchesne County School District
Maintenance Worker

Summer Months: 2021, 2023 – 2026
Duchesne, UT

- Partnered with a team of 8 to construct a 1000 square foot two-story building on schedule
- Resourcefully identified and resolved appliance malfunctions, reducing facility downtime
- Engineered creative and practical fixes for anything broken such as desks, shelves, and flooring

Volunteer Experience

The Church of Jesus Christ of Latter-Day Saints
Missionary

Jul 2021 – Jul 2023
Zambia and Malawi, Africa

- Communicated with a diversity of people in various situations as frequently as possible every day
- Learned patience and empathy through working with and understanding other people
- Led and collaborated with a team of 16 responders for a mission Facebook page
- Took initiative to create tracking spreadsheets that improved reporting accuracy by over 25%

BYU-I CSE Department Drop-in Lab
Tutor

Jan 2025 – Apr 2025
Rexburg, ID

- Proactively gave guidance and explanation of topics in computer programming and engineering
- Increased personal ability to problem-solve and understand problems students are facing
- Developed communication skills for explaining topics at different student understanding levels

Projects

Project Portfolio Website

Sept 2026

- Designed and developed a personal portfolio website featuring projects across 5+ disciplines, including embedded systems, software applications, science and statistics, and craftsmanship.
- <https://brodrickyong.github.io/portfolio/>
